Objective

Aspiring Software Developer with hands-on full-stack development experience. Passionate about building scalable, user-centric applications using JavaScript, React.js, Node.js, Tailwind, and MongoDB.

Skills

Frontend: JavaScript, Python, C++, HTML, CSS, React
Backend: Node.js, Express.js
Frameworks: React.js, Tailwindcss, Bootstrap
Databases: MongoDB
Version Control: Git, GitHub
OS: Linux
Tools: VS Code, REST APIs, JSON, Postman, Data Structures

Projects

WScube Admin Panel (Backend)   *React, Tailwind, JavaScript, Node.js*

- Built a clean and scalable admin panel with secure role-based access.
- Developed efficient CRUD modules for categories, products, and users.
- Delivered a responsive, fast, and user-friendly admin interface end-to-end.
- GitHub: Admin-Panel

Portfolio Website   *React, Tailwind, JavaScript, Node.js*

- Built a responsive portfolio showcasing major projects and skills.
- Implemented smooth UI, optimized loading, and mobile-first design.
- GitHub: My-Portfolio
- URL: Live Demo

Safarly ChetApp (Real-Time Chat Application)   *React.js, Node.js, Socket.io, MongoDB*

- Developed real-time chat using Socket.io with instant message sync.
- Built JWT authentication with bcrypt-secured passwords.
- Managed global chat states using React Context API.
- GitHub: safarly-chetapp

Food Delivery App (Full-Stack Platform)   *React.js, Node.js, MongoDB, Express*

- Developed a complete food ordering system with cart and orders.
- Built Node.js APIs for authentication, orders, and user management.
- Implemented JWT login, form validation, and secure password hashing.
- GitHub: Food-delivery-app

Education

Bachelor of Computer Applications (BCA)   *Expected: Sep 2026*
Lucky Institute of Professional Studies, Jodhpur CGPA: 7.5
